

Anchors - Utility >> Power Shaft

1 1/4" Round Shaft, Multi-Helix

Features:

- 1-1/4 inch diameter round shaft power shaft screw anchor is used in areas where relatively soft soils are present and with moderate holding strength requirement.
- Ultimate torsion capacity of the shaft is 2,300 ft-lbs.
- The ultimate anchor mechanical strength (lead section, extension and guy adapter) is 70,000 pounds.

Application:

- Installed in line with the guy angle.
- If a single helix, then anchor installation may be complete. If multi-helix, then add extension(s) as required
- Go to [1.25 Round Extensions](#) link for extension options
- Go to [Guy Attachment](#) link for guy attachments
- Go to [1.25 Round Shaft Anchors \(under construction\)](#) link for anchor holding strength

Material:

- Hot dip galvanized

Single Helix - 7 foot length - 2,300 Ft. Lb Ultimate Installing Torque				
Catalog Number	Helix Size (Inches)	Standard Pack	Bundle Qty.	Weight Ea (lbs)
D6708	8	1	20	40
D6710	10	1	20	42
D6711	12	1	20	42.4
D6713	14	1	20	55
D6720	(2) 8 & 10	1	20	48
D6730	(3) 8,10 &12	1	20	57

Notes:

- 1) Catalog numbers above are for lead section only.
- 2) Add suffix "-S" for single eye guy attachment; add "-D" for double eye guy attachment; and add suffix "T" for triple eye guy attachment
