

Hardware F-Z >> Guards
Cable, Plastic

Features:

- Plastic U cable guards offer a strong, lightweight, maintenance-free means of cable protection.
- The nonconducting, plastic guards are designed to nest over the one-piece galvanized cable guard as required by many construction standards which call for a galvanized guard at the base and a plastic guard up the balance of the pole.
- The plastic guards may be cut to length in the field.
- Guards are gray in color.

Material:

- Produced from UV stabilized, high impact resistant PVC

Gray Plastic Cable Guard
