Communications Spacers

Communications Spacers

PREFORMED™ Communications Spacers provide an inexpensive way of eliminating mid-span hits on open wire. Spacers keep open wires in their place and prevent lines from "going dead" and momentary shorts and crosses.

Made from rigid, solid $\frac{3}{8}$ ", high-impact, PVC, Communications Spacers possess excellent strength properties. They are designed with a suitable inside diameter for direct application to mid-span locations, and are easily wrapped onto adjacent wires.

Tangent Supports

Tangent Supports

Standard Loop and Elongated Loop Tangent Supports are intended to protect and separate one-pair aerial wires on a common drive hook. They accomplish this in the safest, easiest way possible: just wrap them on and hang them up. Because they wrap on in seconds without tools, they keep installation expense down and provide long, trouble-free service at the lowest possible cost.
